EDUCATION

South Valley University   Qena, Egypt
Computer Science   (September 2021 - June 2025)
3rd Year Student
Major in Computer Science
Cumulative GPA: 2.5/4.0

PROJECTS

ProLink API 🔗 github link

A sophisticated backend API developed using .NET 8, ProLink is a social media platform blending features from LinkedIn and Upwork. It provides users with a professional network to connect with peers, find job opportunities, and collaborate on projects. The API supports user authentication, profile management, job postings, and project management functionalities, making it a comprehensive tool for career development and professional networking.

Learning Shop 🔗 github link

An interactive e-commerce website designed to help beginners learn the fundamentals of programming through engaging courses, tutorials, and resources. Whether you're new to coding or looking to expand your skills, Learning Shop offers a variety of courses covering HTML, CSS, JavaScript, and more. With a user-friendly interface and comprehensive learning materials, Learning Shop aims to make programming accessible to everyone.

Book4u 🔗 github link

An online store where users can buy and sell books. Book4u offers a platform for book enthusiasts to find a variety of books, from textbooks to novels. Users can create accounts, list their books for sale, and browse through available books to make purchases. The platform aims to create a convenient and user-friendly experience for buying and selling books

LMS 🔗 github link

Developed a comprehensive Learning Management System (LMS) using .NET 8 for backend APIs, designed to facilitate seamless interactions between students, teachers, and administrators. This platform supports the creation, management, and delivery of educational content and assessments.
